MISSION STATEMENT

Originally from the biotechnology industry, I changed career paths due to a growing interest in using technology to optimize workflows. Motivated by challenge I want to develop full stack applications to solve business needs.

EXPERIENCE

LEARNERS GUILD

Web Developer | 2016 - present

Ship full stack web applications on a weekly basis.
Incorporate feedback from expert level software engineers.
Conduct peer code reviews.
Integrate with external APIs.
Use good business practices such as pair-programming, TDD, and agile methodologies.

Current Project: World Team USA bootcamp management app
Built from the ground up for customer management.
Front-end: React, Redux, Webpack, and the CSS framework Bulma
Back-end: Node, Express, Postgres, the ORM Bookshelf.

GENENTECH

Project Support Coordinator | 2014 - 2016

Cross-functionally coordinated product sampling requirements.
Developed new tools resulting in a 40% workload reduction.
Facilitated daily governance meetings.
Created and provided trainings for process improvements.

EDUCATION

BACHELOR OF SCIENCE, MAJOR IN MOLECULAR, CELL, AND DEVELOPMENTAL BIOLOGY

University of California, Santa Cruz | 2012
